SUMMARY

For 10 years I've been an audiovisual assistant director and producer, who, seeking new challenges, decided to take a new road down the Front End web development career. I'm keen on details, I have an outstanding aesthetic awareness, I'm proactive, self-managed and obscenely organized. Also, more to the point: I do know a fair amount of HTML5, CSS3 (including Sass), and I'm currently sharpening my Javascript (ES6) skills. I know how to use Git. I'm well educated too: Licensee in Social Communications, Master of Visual Media Design, and currently undergoing a Responsive Website Development and Design Specialization.

EXPERIENCE

Freelancer, Salvador — Assistant Director

OCTOBER 2010 - FEBRUARY 2020

Defined production workflows through script analysis.
Ensured pre-production and shooting targets are met.
Prepared shooting guidelines to meet the budget parameters.
Identified and prevented potential issues and delays.
Organization of pre-production meetings and events.
Casting for actors and supporting roles.
Designed pre-production meeting visual presentations.
